Red Fountain™ steals the show at MIFGS 2007

Drought tolerant and waterwise was the catch phrase this year and ...essential plant qualities that today's gardeners and designers demand in these current challenging conditions. Red fountain™ has won the heart of designers, landscape professionals and home gardeners alike; this was evident in the number of displays featuring Red Fountain™.

Anthony Tesselaar Plants proudly showed off Red Fountain™ at the Melbourne International Flower & Garden Show recently, with an eye catching, mass display along with numerous large display pot specimens that caught everyone's attention and showed just how colourful and versatile Red Fountain™ is!

For those viewing the "Better Homes & Gardens MIFGS TV special", they would have seen Red Fountain™ in a number of the designs.

Friday 31st March, channel Sevens "Sunrise" saw Graham Ross state that Red Fountain was ***"THE PLANT of MIFGS 2007"***.

Thank you to Colourwise Nursery (NSW) for supplying Graham
